

Electronica e usoara

Uite cum se face

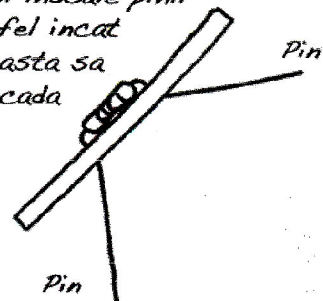

Atentie la pistol
are temperaturi
ridicate

Kitul vine cu indicatii
despre unde trebuie
positionate piesele

Curata varful
pistolului inainte
de fiecare lipitura

Pune componenta la locul
ei si indoaie pinii
astfel incat
aceasta sa
nu cada

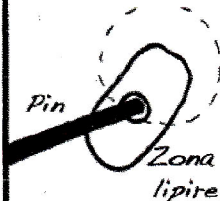

Pune circuitul imprimat
cu fata in jos intr-o
pozitie stabila pentru a
lipi

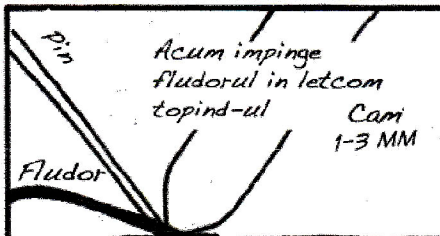

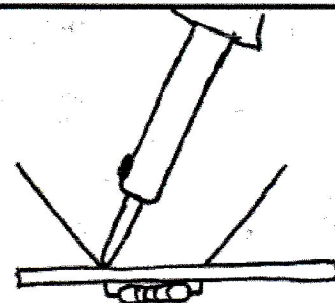

OK, SA LIPIM!

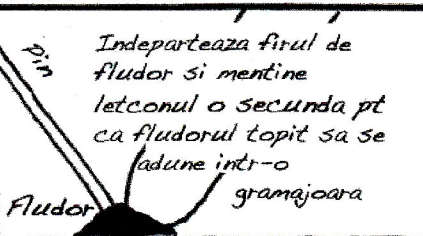

Incalzeste si zona de
lipire si pinul timp de 0
SECUNDA

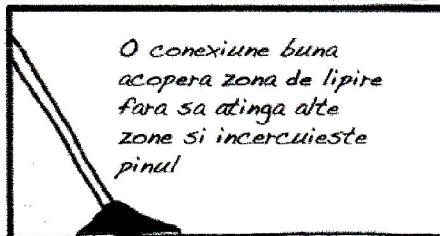

PSST!
Curata
varful
letconului

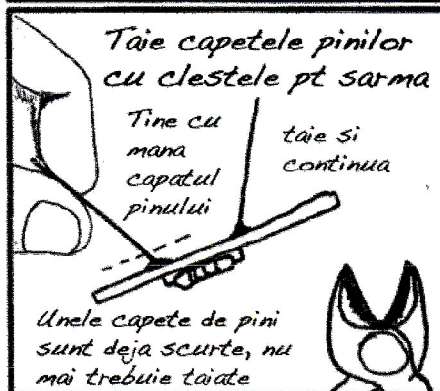

Circuit imprimat

Circuit imprimat

Circuit imprimat

Continua sa lipesti componentele
la locul lor in modul indicat
**Daca toate lipiturile au
fost realizate corect
circuitul va functiona!**

Mai sunt si alte smecherii dar
deja poti lipi un kit singur!
